1) INTRODUCTION & BACKGROUND

Contract type:	Consultancy and Services
Duration of assignment:	25 July – 09 August 2024
Type:	Individual or Firm

Background of Project & Assignment:

As the World's leading packaging and processing company, Tetra Pak has been manufacturing and supplying aseptic dairy and juice beverage cartons in Pakistan since the past 40 years.

In line with its strategic ambition to lead the sustainability transformation, Tetra Pak aims to achieve its recycling targets by 2030. In the aftermath following Covid-19, the world has observed an increased stress on food supply chains and there is a rising need for innovative and integrated solutions to feed a growing population sustainably. To address this issue, as a member of the global Tetra Pak family, Tetra Pak Pakistan, is actively working to increase the recycling of Used Beverage Cartons (UBCs) so it continues to provide people with access to high quality and safe beverage items. To support Tetra Pak Pakistan in this endeavor, WWF-Pakistan, has been working to understand and strengthen the UBC value chain, evaluate recycling rates and establish contacts with more paper mills each year to upscale the recycling of UBCs in various scope cities of Pakistan. This report contains the results for the sampling and survey data gathered from field visits conducted for each scope city. Notably, it outlines UBCs quantities in the old, corrugated cartons and the mixed paper waste, including its collection and recycling quantities for all scope cities. Using this information, the report analyzes the feasibility to upscale UBCs recycling in Pakistan by providing recommendations and the way forward.
