## 1) INTRODUCTION & BACKGROUND

Contract type: Consultancy and Services  
Duration of assignment: 25<sup>th</sup> Aug 2025 – 31<sup>st</sup> Dec 2025

WWF-Pakistan's Food & Agriculture Programme (F&M) was initiated in 2004 with the primary objective of enhancing the capabilities of approximately 200 farmers in adopting sustainable practices within the cotton landscape. Over the years, the program has experienced substantial growth and has evolved into one of the most extensive initiatives within WWF-Pakistan. The overarching goal of the Food & Agriculture Programme is to address and alleviate the environmental impacts associated with input-intensive crops, particularly in terms of water usage, agrochemicals, and synthetic fertilizers, as well as the sensitivity of crops to pests. This is achieved through a multifaceted approach, including empowering farmers with knowledge of economically efficient ecological farming solutions and cutting-edge technologies. The program also focuses on engaging various stakeholders and fostering the development of sustainable supply chains in the agriculture sector. The programme has recently initiated Regenerative Production Landscape Collaborative (RPLC) project which is a model for sustainable agricultural systems. It aims to strengthen agricultural systems that conserve and enhance natural resources, build community resilience to climate change, and secure the long-term supply of agricultural commodities. The RPLC adopts a multi-stakeholder governance model that brings together diverse stakeholders, such as local communities, farmers, governments, businesses, and NGOs, to drive market transformation. Through this approach, stakeholders align with the distinct challenges of each ecosystem and collaborate to identify systemic problems and implement targeted solutions. This focuses on a holistic approach to land management that creates long-term value for all. The current assignment is the mapping of overall project boundaries as well as interventions/sustainable practices of partners.
