1) INTRODUCTION & BACKGROUND

Contract type:	Consultancy and Services
Duration of assignment:	1 st August 2026-17 th Nov 2026
Consultancy Type	Firm

WWF-Pakistan's Food & Agriculture Programme (F&M) was initiated in 2004 with the primary objective of enhancing the capabilities of approximately 200 farmers in adopting sustainable practices within the cotton landscape. Over the years, the program has experienced substantial growth and has evolved into one of the most extensive initiatives within WWF-Pakistan. The overarching goal of the Food & Agriculture Programme is to address and alleviate the environmental impacts associated with input-intensive crops, particularly in terms of water usage, agrochemicals, and synthetic fertilizers, as well as the sensitivity of crops to pests. This is achieved through a multifaceted approach, including empowering farmers with knowledge of economically efficient ecological farming solutions and cutting-edge technologies. The program also focuses on engaging various stakeholders and fostering the development of sustainable supply chains in the agriculture sector.

With a substantial increase in demand for organic cotton fiber products, both from global retail markets and farmers opting for organic cultivation, there is a growing trend toward sustainable agricultural practices. Certain naturally fertile and uncontaminated regions in Pakistan hold immense potential for large-scale organic cultivation.

WWF-Pakistan's Organic/ Regen Cotton Projects, operating within the framework of the F & A Programme, actively advocate for the adoption of standard organic and regenerative practices in cotton farming. This includes the prohibition of synthetic fertilizers, synthetic pesticides, and GMO seeds. Currently, the organization collaborates with nearly 10,189 farmers across Balochistan, Punjab, and Sindh provinces, covering over 87,447 acres, to promote organic/ regen cotton cultivation.
