1) INTRODUCTION & BACKGROUND

Contract type:	Consultancy and Services
Duration of assignment:	1 Months
Type:	Individual/Firm

Background of Project & Assignment:

In Punjab and Sindh, Pakistan, WWF Pakistan is leading a substantial project funded by Better Cotton/GIF. This project empowers cotton farmers by equipping them with the knowledge and skills to adopt the Better Cotton Standard System (BCSS). The focus is on providing comprehensive training and improving adoption on sustainable cotton farming including Soil health management, water management, crop protection, pesticide use, biodiversity management, decent work and sustainable livelihood.

The use of pesticides has impacts on social as well as environmental aspects and along with unchecked and injudicious use of these harmful chemicals comes another challenge, i.e. self-mixing of pesticides by the farmers. WWF-Pakistan actively promotes sustainable practices, like Integrated pest management, for the control of insect pests in the field and encourages the farming community to reduce the reliance on chemical pesticides but there are other entities that work in the opposite direction. The pesticide companies have substantial influence and presence in the field, and they promote use of mixing of pesticides. The self-Mixing and application of two or more chemicals can have serious consequences and repercussions on human and animal health and environment. The development of video clip on avoiding the self-mixing of two or more chemical pesticides, can help in sensitization and creating awareness among the farming community on large scale in Better Cotton project area.

WWF Pakistan with financial support of Better Cotton aims to sensitize and encourage the farming community on avoiding the self-mixing of pesticides and awareness about its risks to human health and environment.
