Technical training on Livestock farming and first aid treatment training” as a profitable livestock rearing and improved livelihood opportunity for female farmers in Baluchistan.

Organic Cotton Project, Sustainable Agriculture & Food Programme

1. Project Background

WWF-Pakistan, under its Sustainable Agriculture and Food Programme has been engaged since 2016 in promotion of Organic Cotton cultivation in Balochistan with the financial support of Laudes Foundation. The Organic Cotton Project (OCP) aims to promote organic agriculture through a holistic scheme of farmers’ training and development of a viable organic cotton supply-chain. With the involvement of Department of Agriculture Extension Govt. of Balochistan, around 6000 farmers of Lasbela and Barkhan districts will be trained under the project to shift nearly 24,000 ha land, previously under conventional farming, to organic agriculture farming and its certification. The project demands very active engagement of all of its stakeholders including farmers, ginners, buyers, and implementing partners to develop a conducive environment of organic farming in Pakistan. The project also includes training of 1200 women on alternate livelihood options and establishment of few model women led entrepreneurs as well as training of 900 farmers on natural resource management. In the current era of women empowerment, we plan to equip the women folk with need-based training and capacity building on some specific farming skills that can help them to explore alternate income generation opportunities.

2. Objectives

The main objectives of this training course are

• Capacity building of Women workers on “Livestock farming and first aid treatment training” as a profitable livestock rearing and improved livelihood opportunity for female farmers in Baluchistan.”
  • To provide the opportunity to local female farmers to improve the milk production of livestock animals
  • To facilitate the females in reducing the health risks of livestock
  • To provide knowledge to local female farmers to treat their animals for basic diseases
  • To facilitate the women farmers in improving their livelihood through profitable livestock farming
  • To train a group of females to provide basic first aid health services in local villages
  • To provide the basic health facility through livestock extension work/ Farmer help camp in resource poor settings

3. Scope of Work:

Training course is to develop a comprehensive content that combines theoretical concepts and practical implementation to ensure that by the end of the training, participants will be able to follow simple and systematic processes. The training will be conducted in Rakni, Balochistan for 6 days.
4. **Specific Tasks:**

The training should comprise of the following activities:
